About 40 million Americans have hearing loss¹. In fact, about 12% of the U.S. working population has hearing difficulty². Because hearing loss can affect people of all ages, Delta Dental of Virginia is teaming up with Amplifon Hearing Health Care to offer quality care and special savings for your employees' hearing needs.

What causes hearing loss?

Hearing loss can be caused by obstructions in the ear or permanent damage to the inner ear. Common causes of permanent damage include exposure to noise, aging, some health conditions and certain medications.

When should members get their hearing checked?

Members should have their hearing screened every three to five years or tested annually after age 50. They should also have their hearing screened if they are experiencing:

- Consistent exposure to loud noises,
- Difficulty understanding others in noisy environments,
- Feeling as though people are not speaking clearly or are mumbling, or
- Consistent ringing in their ears.
