

DentaQual ratings

Delta Dental of Virginia makes it easy to find a preferred in-network dentist with the Find a Dentist tool at [DeltaDentalVA.com](https://www.DeltaDentalVA.com). The Find a Dentist tool also utilizes a star rating system to help identify a dentist that best meets our members' needs — with DentaQual®.

WHAT IS DENTAQUAL?

DentaQual is a five-star rating system developed by an independent data company. It measures dental care quality using claims data — not reviews. Dentist ratings appear with their listings in the Find a Dentist tool.

HOW ARE DENTISTS RATED?

Dentist performance is evaluated across five areas:

- Treatment outcome,
- Patient retention and
- Commitment to best practices,
- Treatment recommendations.
- Cost-effectiveness,

Ratings are benchmarked against the average performance of similar dentists in the same area. DentaQual ratings are available for dentists with sufficient data to generate a score. If a dentist does not currently have a rating, one may appear in the future as more data becomes available.
