

Special Health Care Needs Benefit

For the nearly 57 million people in the U.S. with intellectual or developmental disabilities,* oral health care can be inaccessible or overwhelming. Delta Dental of Virginia is working to change that.

The American Academy of Pediatric Dentistry defines special health care needs as any physical, developmental, mental, sensory, behavioral, cognitive or emotional impairment or limiting condition that requires medical management, health care intervention, and/or the use of specialized services or programs. The condition may be congenital, developmental, or acquired through disease, trauma or environmental cause and may impose limitations in performing daily activities. Individuals who fall into these categories often require extra care.

Check if your dental plan includes the Special Health Care Needs benefit to provide the best possible experience when visiting the dentist.
